

We Believe in Inclusive Play

Simple pleasures. If we think back to the wonderful memories that we had as children and heading to the playground with our parents, siblings and friends, some of the things we might think about was climbing on the monkey bars, feeling the pull as we twirl on the merry-go-round, or yelling, "Push me higher!" on the swing. In our mind we can still hear the laughter and feel the joy. Those were the days, weren't they?!

Sadly, it's not that way for everyone.

Here at Johnson County Board of Services and Sheltered Workshop we have a dream, a big dream, to have a playground where parents and children of all abilities can enjoy those very things also, and we need your help.

We want to hear your story.

What would it mean to you, your family and friends to have an inclusive playground in our community? What types of challenges do you face at a playground that is designed for the typically abled? What would you like to see available for all children to enjoy? Have you ever been to an inclusive playground and if so, what equipment was there that caught your attention?

Please send/bring us your thoughts at 200 North Devasher Road, Warrensburg MO, 64093 or via email at believe@jcmb.com. A cell phone video would be super great too!

Thank you!

(A send in form is on the back of this page.)
